

*"Whether you're a CSI fan or just a lover of bugs, you're really going to like this unique exhibit."*

*Anthony E. Zuiker,  
Creator & Executive Producer  
of the hit TV Series CSI.*

*"It's revolting but mesmerizing." Las Vegas Sun*

*"Not for the squeamish." USA Today*

*"The bugs don't lie." Associated Press*

*"Viewer discretion is advised." Sophia Choi, KVBC Las Vegas*

**CSI: Crime Scene Insects** investigates the fascinating field of forensic entomology, or the use of bugs to help solve crimes. Insects are often the first to arrive at a crime scene and can provide many clues as to what may have happened. They are considered to be one of the most reliable sources for estimating the time of death, and can also be used to determine the location of the crime, the nature of any wounds, and whether or not drugs or other toxins were involved.

**If you're into forensics this is one must-see exhibition!**

**Only in Las Vegas through September 1st.  
Don't miss it!**
